Bachelor Of Computer and Information Science

Course work: Software engineering, Database Design,Business Intelligence and Data Warehousing, Software Security, Mobile application development, Usability

Experience

Jan 2020 - Nov 2020

Academic Tutor @IIE MSA
Cyber Security

- Teaching weekly tutorial classes of between 10-15 students, facilitating discussion around course material and weekly class topics.
- Assisting the supervising lecturer marking assignments according to a standardized rubric and personal discretion/experience.
- Providing online support to and interaction with students, including sending informational email reminders/answering concerns via email.

Selected Projects

Simba4Cars Live Link

An interactive car salesman website that lists and displays vehicles retrieved from an api based cms.

- Developed and developed the frontend of the web application using Gatsby.Js, a React Framework for static site generation.
- Incorporated the GraphQL based cms Contentful to store and retrieve listed vehicles.
- Used Styled Components and react-bootstrap for styling the application.
